

**Splash and Bubbles are exploring down in the deep. It's dark! How do fish see in the deep?**

**Use a brightly colored crayon to draw a "glow" around the creatures that use bioluminescence in the deep ocean.**

### **Fin Fact!**

Bioluminescence is caused by a bacteria that sustains a symbiotic relationship with its respective sea creature. These animals use bioluminescence to attract or confuse prey and provide light.

FUNDING PROVIDED BY:

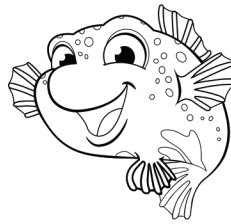

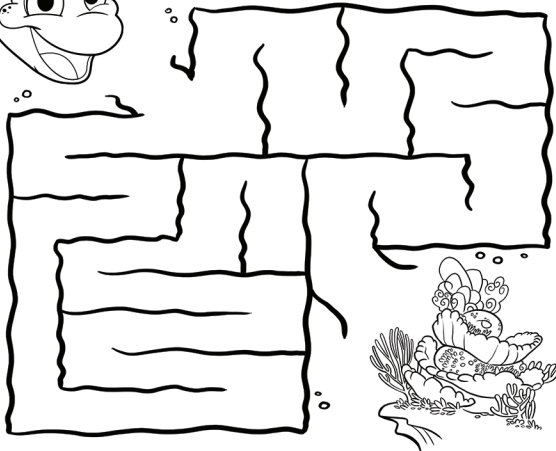

**Splash, Bubbles, Ripple and Dunk**  
are **OCEAN FRIENDS FOREVER!**

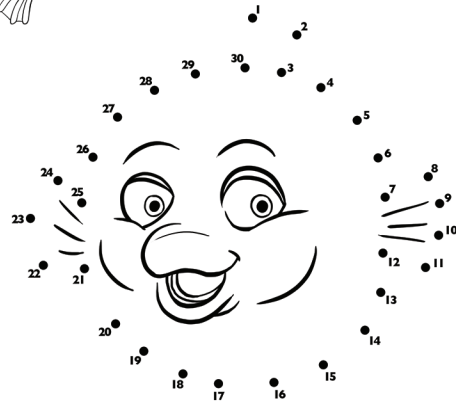

**Reeftown Ready!**

Splash has traveled around the world and is ready to go home. Help him ride the currents back to Reeftown!

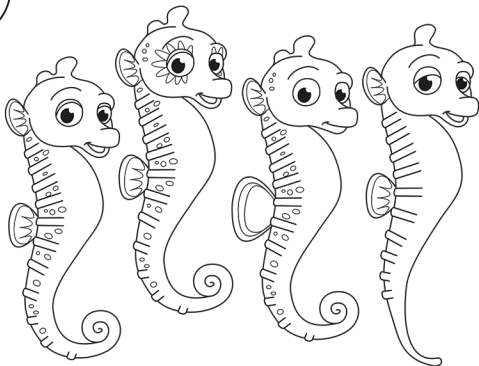

**Dot to Dot with Dunk**

This is Dunk. He can do something very special to scare off predators (or bigger fish.) What kind of fish do you think he is?

**Spot the Seahorse**

This is Ripple. She has 499 brothers. Can you spot their differences?

**Goopy Gloppy Goo!**

Bubbles likes searching for treasure in the yucky and all that's mucky. What can you find in the mud?
