

The Adventures of

Brickly

By Turner

Brickly was a kid that was picked on at school, because he was too little for his age. He was in fifth grade and didn't have a girlfriend. He did not like school!

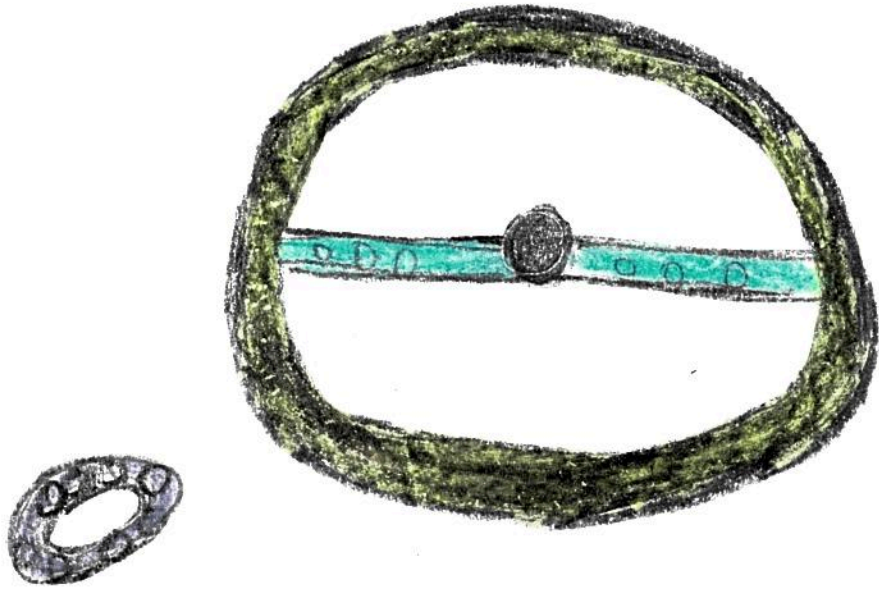

One morning he woke up
and decided to use his

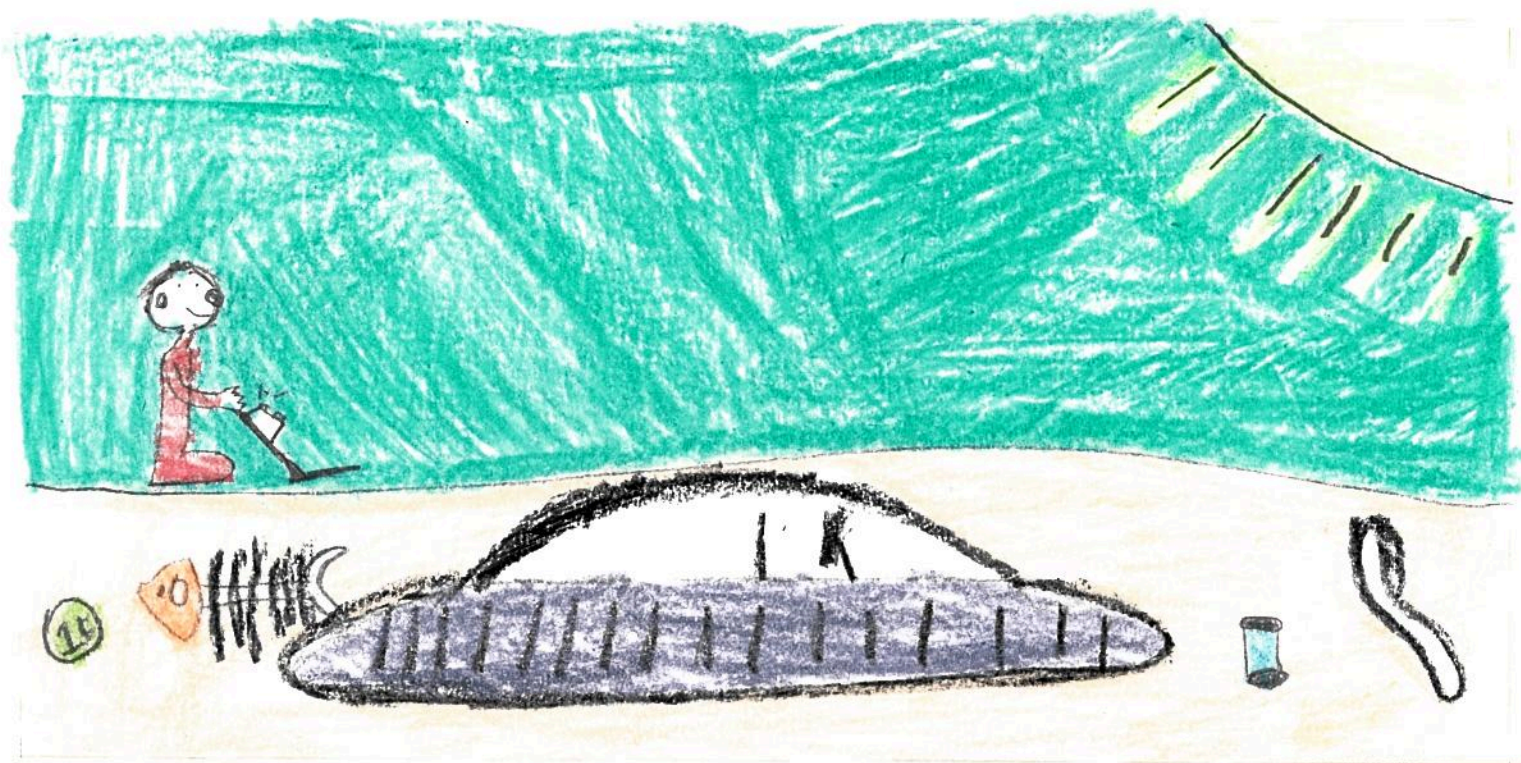

practical knowledge. Brickly got
his car, and that's when the
fun began!!

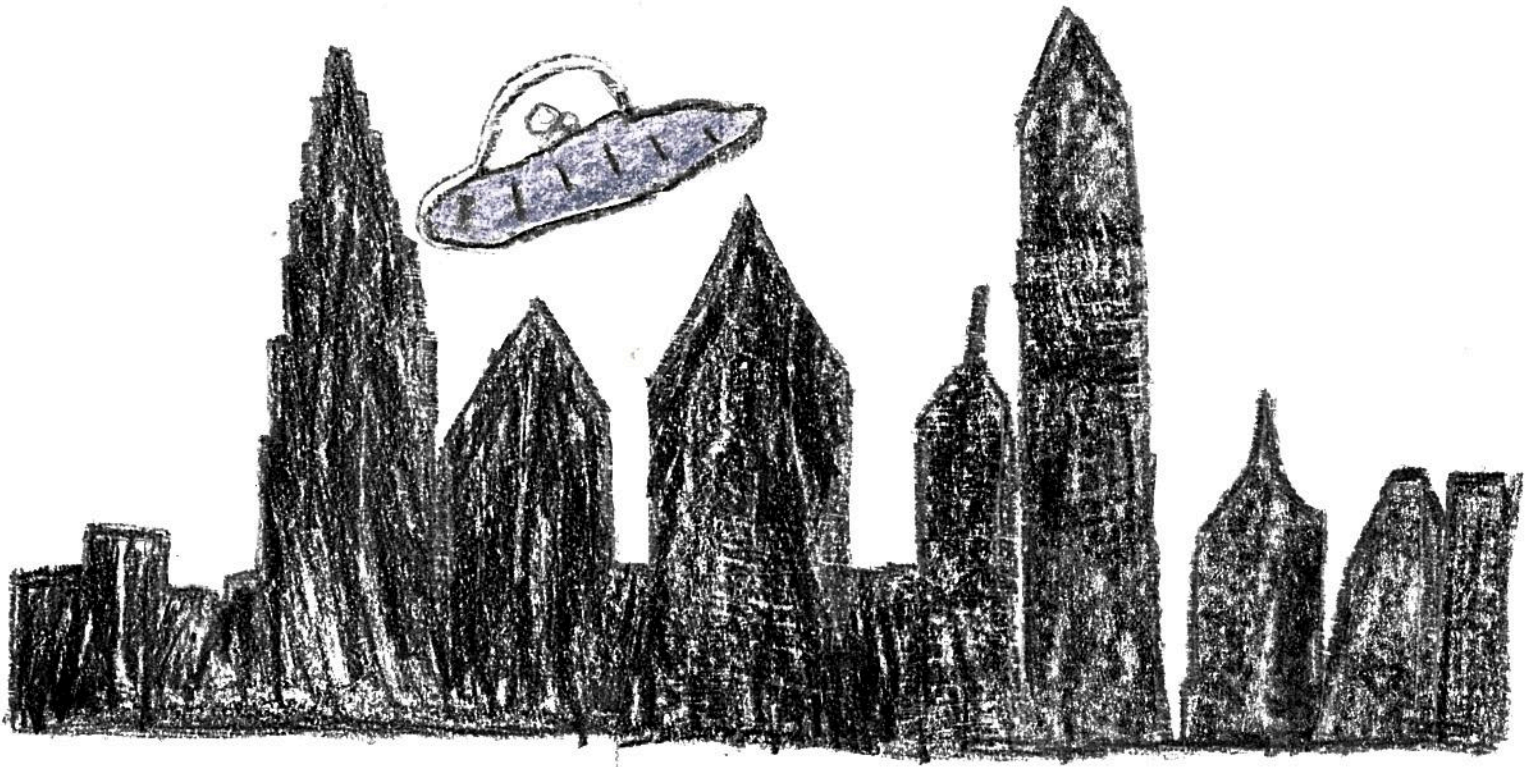

He went to the beach and
the first thing he found was
a soda can. It was crushed! But..
when Brickly picked it up, out
crawled a hermit crab! Next he
found a penny. How boring!

He gave up! But then Brickly
remembered the "cool stuff"
setting on his metal detector! Then
it went crazy! He dug and dug.
He found a very old Steering
Wheel. With it, he found a friendship
bracelet also. He felt good now!

He walked down the beach a
bit. Suddenly his metal detector
went really crazy! He started to
dig. An hour later he found it.
It was an alien spaceship!!!
How exciting!

He found the deer and gets in.

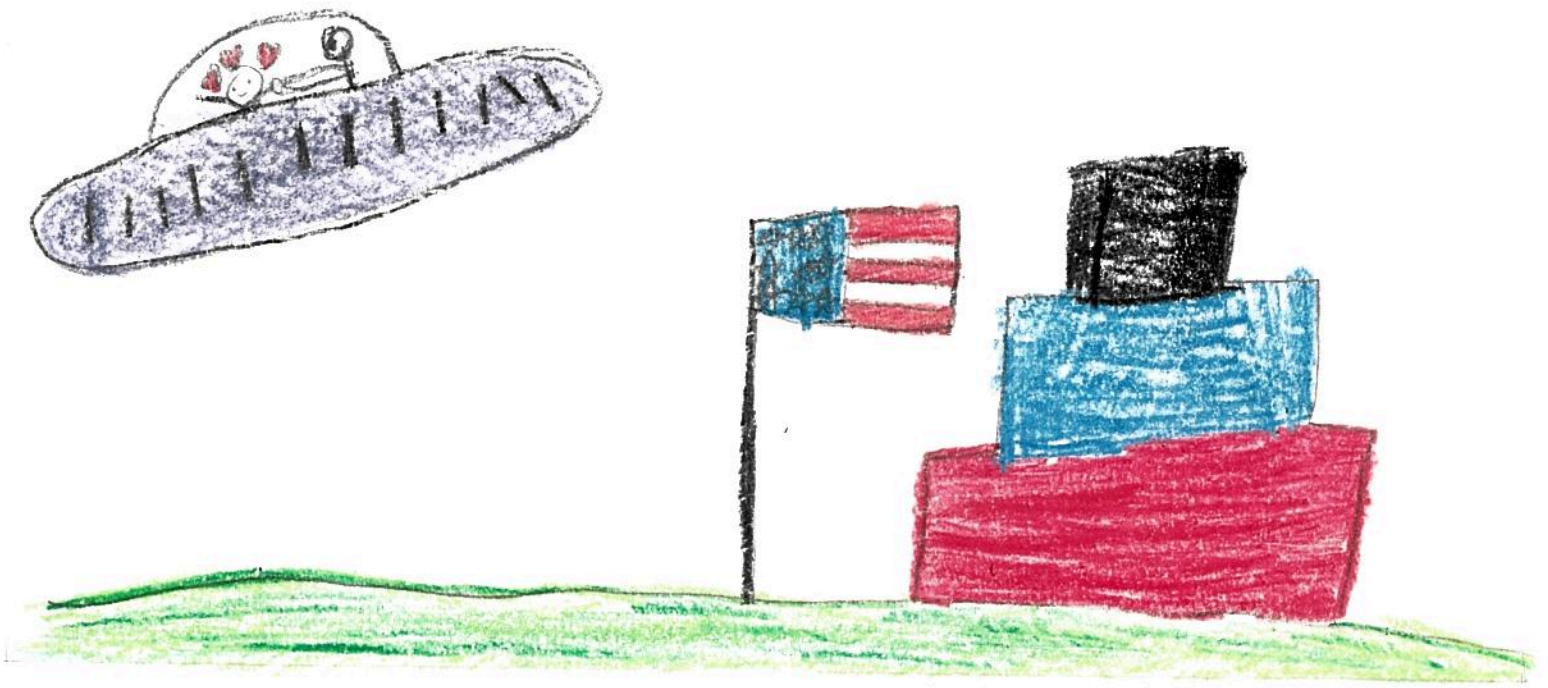

Automatically, it turns on and lifts

off. He flew the spaceship to

New York City for no good reason.

Then he gets a thought. Brickly

flies to his school.

When he got to school the boys who
picked on Brickly all wanted rides.
But Brickly takes Olivia. He gives her
the friendship bracelet. Life is good for
Brickly. The End
